

HCA Davie Hospital

Davie, FL

Facades 

Project Details

Owner

HCA Healthcare

General Contractor

Brasfield & Gorrie

Architect

Earl Swensson
Associates, Inc.

Building Type

Healthcare / Hospital

Onsite Assembly Date

January 2019

Panel Type

StoPanel Classic ci

Project Overview

Smart scheduling and subcontractor coordination was the order of the day in this project. Southern Wall Systems worked against the clock to design, fabricate and install StoPanel Classic ci panels so this essential regional hospital serving Davie Florida could open as scheduled.

Job Requirements

The stakes are always higher with a hospital, and they certainly were with the HCA Davie project. First, other trades were depending on Southern Wall Systems to seal the building quickly so the interior work including installation of complicated medical subsystems could begin. Second, this was a community hospital, and until the project was completed, it couldn't serve the people depending on it. To say there was a sense of urgency was an understatement.

Smart Solution

Knowing that installation of the hospital subsystems was a complicated and time-consuming process, Southern Wall Systems was determined to seal the building as quickly and efficiently as possible. They planned ahead by prefabricating the StoPanel Classic ci panels in advance of the onsite work, allowing them to install the finished panels without delay. They completed their work and sealed the building quickly, allowing the intricate interior work to begin. The overall timeline was accelerated and the hospital was able to begin serving the community on schedule.
